

AKINROBOTICS

CORPORATE IDENTITY WORK

We are AKINROBOTICS Family

The world's first humanoid robot factory AKINROBOTICS is a private sector enterprise established with the own capital of AKINSOFT, Turkey's largest domestic software company in the field of robotic technologies.

Robots produced under AKINROBOTICS have been designed by AKINROBOTICS' own capital, with the R&D studies of its engineers, and is prepared with the aim of domestic production. With its highly equipped staff, it produces all of the robots it has developed without being dependent on foreign sources.

AKINROBOTICS, which has a robotic application area of 11.000 m² and a closed working area of 3800 m², is the first Humanoid Robot Factory to make mass production with a team of engineers and technicians who are experts in their fields.

In order to increase the interest of Turkish people in science, developing technology and scientific thought, and at the same time, to move our country to the top with the studies in the field of robotic technologies, it has started to work by adopting a superior service quality approach.

AKINROBOTICS, which aims to serve humanity and science, aims to increase the quality of social life and to allow people to work in more qualified jobs by loading monotonous jobs that are contrary to human ergonomics and endangering life to robots.

AKINROBOTICS, as a private sector enterprise established with its own capital, continues on its way in this success story.
